When three baby owls awake one night alone in a dark forest to find their mother gone, they can't help but wonder where she is and when she'll return. Stunning illustrations from unique and striking perspectives capture the spooky forest and reflect the many emotions that beset these endearing owls. Never has the plight of young ones who miss their mother been so simply told or so beautifully rendered.

Pepe and his grandfather José did not know how to read or write. One day, they had an argument and, in order to communicate with each other, they hired Miguel, whose job was to read and write for illiterate people. Many letters were passed from one to the other while Pepe paid Miguel by going to school, and José paid him with flowers from his own garden. Pepe kept going to school, and wrote a letter to the government asking for a pension for his grandfather.

In a compelling, easy-to-read narrative, children will learn all about a pivotal moment in American history.

Leo feels fascinated and intimidated by Stargirl, the new girl at school. She is a special girl, immune to the criticism of the rest of the kids; she also draws a lot of attention to herself, something that he would never do. She touches the lives of many, and her story becomes a lesson of how those who are considered different almost always become immortal.

One day, the bees called for a grand assembly in the beehive to discuss why it was that they were always all squashed together in cramped working conditions. After complex calculations, they realized that there was one bee too many in their beehive! Through entertaining illustrations and humor, this delightful story explores such serious topics as prejudice and tolerance.

Author David J. Smith has found clever devices to scale down everything from time lines (the history of Earth compressed into one year), to quantities (all the world wealth divided into one hundred coins), to size differences (the planets shown as different types of balls). A great classroom reference that can be reached for again and again when studying scale and measurement, and also for math applications in other disciplines.

Candles, cut paper, "bread of the dead," salt, marigold flowers: November has arrived, and with it, the Day of the Dead. The living prepare the altars and the dead embark on the journey, guided by the smoke of the incense. Once a year, the living and the dead meet to celebrate not death, but life. Eight-syllable calaverita verses and a love story take place in this celebration of one of Mexico's most emblematic holidays.

Natacha writes to her dog Raffles, telling him all about her beach vacation. She goes to a library with her classmates to do research on The Beatles, and makes significant progress in her English language studies. She consults the I Ching and is advised to "cross the great waters." She also asks questions like "Mom, did you know we are supposed to be competing for Dad's attention?"

Each family has different characteristics: some speak in a special way or have beliefs or customs different from our own. When reading this book, children will be able to realize that, despite the similarities and differences between families, we all have the same rights. Pescetti addresses a delicate topic and creates a book that is as fun as it is educational. Ideal for working on peace education in schools.

Marie Antoinette was born into royalty in 1755 and married the future king of France at age fifteen. She enjoyed a lavish lifestyle of masquerade balls, sky-high wigs, and extravagant food. The poor people of France blamed her for their poverty. Her spending helped incite the French Revolution. In 1793, she literally lost her head because of it. Whether she was blameless or guilty is debatable, but Marie Antoinette remains woven into the fabric of history and popular culture.

José Martí was barely sixteen years old when he began to fight for the independence of his homeland through his writing. At seventeen, he was declared an enemy of Spain and sentenced to six years of prison and hard labor. But that did not stop him. Martí dedicated his life to defending Cuba's right to independence. Today he is remembered and honored as a man of integrity—brilliant and courageous—and as a lover of freedom and peace.

This story starts in a dark alley in Barcelona where the cats are up and about. They need to eat and go in search of a feast. There is no scarcity of work, but they like to rest. Their games, at times, are fights that the light can calm down, and when they travel by the light of the moon, their shadows make silhouettes. With the rhythm of the blues, these verses describe stray cats in a sentimental way.

This anthology of love poetry for young adults brings together great twentieth-century Spanish and Latin American authors that take on the topic of love from every angle: the memory of a childhood sweetheart, the love between parent and child, passionate love, unrequited love, and love that only absence inspires.

In this carefully curated volume, the reader can clearly sense the intention behind the work: to show, as the anthologist says, that poetry is a way to write love... and to write life.
