¿Quién manda en los bosques? Interacciones en un ecosistema

(Who's the Boss at the Forest? Interactions in a Ecosystem)

ISBN: 9781641012126

32pp | PB | \$17.99 | GRL: M

BISAC: JUVENILE NONFICTION /

Science & Nature - Botany - Trees & Forests -Flowers and Plants -

Environmental Conservation & Protection / **Language Arts** - General

In the beginning of time, where we now have forests, the landscape was barren and arid. But then the wind carried seeds to these sterile grounds which soon began to grow, slowly transforming these areas into lush forests filled with trees of all shapes and sizes. This book explains how this process occurred and teaches us why forests are so important for life on our planet.

Mi-Gyeong Kim

El viaje del polen: La reproducción de las plantas

(Adventures of Pollen: Plant Reproduction)

ISBN: 9781641012140

32pp | PB | \$16.99 | GRL: M

BISAC: JUVENILE NONFICTION /

Science & Nature - Botany - Flowers and Plants -

Trees & Forests / **Language Arts** - General

Unlike animals, plants don't have wings or legs to help them move around. Instead, plants must rely on the wind, water, and various animals to send their pollen and seeds across great distances. This colorful book will help you learn about the many different and creative ways plants reproduce.

Tomemos en cuenta los sentidos

(Let's Talk About the Senses)

ISBN: 9781641012188

32pp | PB | \$16.99 | GRL: M

BISAC: JUVENILE NONFICTION /

Science & Nature - Anatomy & Physiology /

Language Arts - General

People and animals depend on the information they receive from the environment to survive. We can get this information thanks to organs like our eyes, nose, tongue, and skin. This book offers a fun and detailed look into how our five senses, and the organs in charge of them, work.
